DETAILED ACTION

Examiner acknowledges the amendments to the claims submitted on May 15, 2006 in response to the first office action.

Response to Arguments

Applicant's arguments filed May 15, 2006, with respect to claims 1-4 have been fully considered and are persuasive. The rejection of claims 1-4 has been withdrawn.

Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: no prior art was found that taught a core-less coiled guidewire being coated between adjacent windings of the coil and the coating being thicker on one side of the perimeter than on the other. The closest prior art that was found was Gardeski et al (6146338), but Gardeski does not disclose coating on the perimeter of the guidewire. Gardeski disclose welding a tube onto one side of the interior of the coil that provides a backbone to that side of the guidewire. Gardeski does not disclose coating the wire at all, and therefore does not disclose a coating being thicker on one side of the wire being thicker than that on the other perimeter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
